FLATBED SCANNING PRICE LIST

We offer flatbed scanning services on a multitude of professional grade A3 scanners with dedicated LFOV macro lenses which enable truly remarkable color reproductions, dynamic range and sharpness of scans. We use the Screen Dainippon FTS-550 (Scitex 342L) for our most demanding clients who need scans of up to 5600dpi optical for their transparency and reflective work. We also use the Heidelberg Topaz for items with media that is not on paper - glass negatives, books, bound graphics, etc. Welcome to contact us if you have any questions.

FUJI FRONTIER SCANNING PRICE LIST

We offer fast and efficient film scanning services for 135 and medium format film on our Fuji Frontier SP500 and Fuji Frontier SP3000 Film Lab Scanners. While these scanners can output superb results, they are often times used with all automatic adjustments enabled which produce a less superior scan than it is possible to achieve. We have rebuilt our scanners and can now offer superb scanning solutions at a much faster and more efficient rate than by using a flatbed or a drum scanner. The best option for an enthusiast photographer who is still expecting professional scanning results.

135 FILM		Resolution			UNCUT ROLL		ROLL IN STRIPS	
		DPI	Resolution	MP	with crop	with border	with crop	with border
